Feature enrichment by alternative−promoter category
* = FDR < 0.05 (Fisher's exact test, category vs. rest)
Secondary promoter
Main promoter
No alternative promoters
LTR
No activity in mouse
LINE
Transposable elements
DNA transposon
Narrow promoters
High tissue specificity
None Cis Regulatory Module
SINE
Non canonical TSS
Human inserted
High conservation (−150 to −235)
High conservation (−50 to −150)
Enhancers at 50kb window
TA at TSS
CA at TSS
Strong TSS
High conservation (16 to −50pb)
TG at TSS
TATA−box
Unidirectional promoter
TCT
Low Complexity Repeats
CCAAT
GC−box
CpG islands
Broad promoters
CG at TSS
High G+C content
High chromatin accessibility (DNase−seq)
Low tissue specificity
High activity in HEK293
log2 enrichment
